

Subject:

01/05/01

The following directive is issued to all DAACS and labs. Problems with the Clearcase installation script for IRIX 6.5.9 installation.

Issue:

In the implementation of IRIX 6.5.9, a problem was found with the Clearcase installation script. It was found in the script to be used only for IRIX 6.5.6 instead of IRIX 6.5.X.

Fix:

The following is the fix for the Clearcase installation for IRIX 6.5.9 installation:
The modification is to a single line in the IRIX.pl script on or near line 56:

```
((${os_ext_rls} eq "") || (${os_ext_rls} =~ /6.5.[123456]/))) {
```

Change that line to:

```
((${os_ext_rls} eq "") || (${os_ext_rls} =~ /6.5.[123456789]/))) {
```

That will allow the administrator to install Clearcase on an IRIX 6.5.9 host.

Testing:

Testing was completed at LaRC.

Implementation:

This technical directive should be implemented along with the IRIX 6.5.6/IRIX 6.5.9 PSR document.
